March 2017

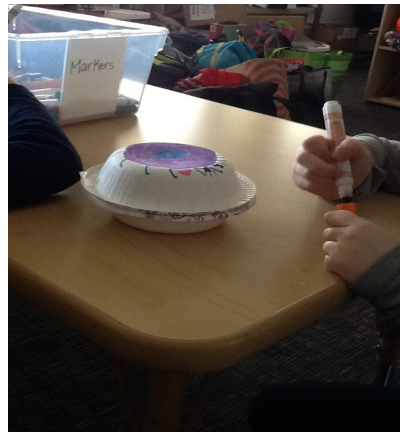

Recap of March

The children had a great time in March. We got to use our imaginations to venture to outer space. Children were able to create galaxy bottles, with a few household material. Other children explored some of the historical events that have occurred in space exploration. It was an educational month for all of us.

On top of learning so much about space, the children were able to do other amazing things. For example the 2nd and 3rd graders made tasty snacks for their peers to try. 4th and 5th graders have started following

March Madness and discussing possible teams to win. (Even though we all know that Villanova will be the champions :) .) The Pre-k/Kinder group created their own Dr. Seuss board. This has been a well rounded month of activities. I am excited to see what April will bring us.

Spring Break At Kenny

Just a reminder that we will be at Kenny Elementary School for Spring Break. It will be a week filled with great field trips and awesome themed days. The dates are March 31st– April 7. If you need to reach me between those dates please email me or call 612-290-8873.

School Year Enrollment

The 2017-18 school year enrollment will start in April. For current families, enrollment begins on April 17th at noon. Enrollment for other families begins May 1st at noon. Please let me know if you have any questions about enrollment.

Still Need Clothes

Thank you for your clothes donations. Please continue to bring things in. We are in need of pants (for both girls and boys) and underwear (for both girls and boys). Thank you for your help in advance.

Kids Welcome:

After School
1:50pm—6:00 pm

Snow (Finally!)

Even though we only had a little bit of snow, the kids had a blast doing a bit of sledding. I wanted to share some of the photos of the kids enjoying some winter fun!

April

Spring is, hopefully, finally here. Our theme for the month of April is 'Planting our Roots.' The children and staff will be spending time talking about different habitats and the plants and animals that live in them. For example, some groups will be creating animals with different art material. Some students will also be making bird feeders, for some of the animals outside our doors. I hope the bird feeders will invite some beautiful birds.

Since it is spring, we will be planting different flowers and even starting some vegetables for students to take home with them. I cant wait to see all the beautiful flowers and vegetables that the children start. Along with planting the flowers, the students will be learning how plants help our environment. It will be a great learning experience for all of us.
